Gemma 3

This model requires Ollama 0.6 or later. [Download Ollama](#)

Gemma is a lightweight, family of models from Google built on Gemini technology. The Gemma 3 models are multimodal—processing text and images—and feature a 128K context window with support for over 140 languages. Available in 270M, 1B, 4B, 12B, and 27B parameter sizes, they excel in tasks like question answering, summarization, and reasoning, while their compact design allows deployment on resource-limited devices.

Models

Text

270M parameter model (32k context window)

```
ollama run gemma3:270m
```

1B parameter model (32k context window)

```
ollama run gemma3:1b
```

Multimodal (Vision)

4B parameter model (128k context window)

```
ollama run gemma3:4b
```

12B parameter model (128k context window)

```
ollama run gemma3:12b
```

27B parameter model (128k context window)

```
ollama run gemma3:27b
```

Quantization aware trained models (QAT)

The quantization aware trained Gemma 3 models preserves similar quality as half precision models (BF16) while maintaining a lower memory footprint (3x less compared to non-quantized models).

1B parameter model

```
ollama run gemma3:1b-it-qat
```

4B parameter model

```
ollama run gemma3:4b-it-qat
```

12B parameter model

```
ollama run gemma3:12b-it-qat
```

27B parameter model

```
ollama run gemma3:27b-it-qat
```

Evaluation

Benchmark Results

Gemma 3 270M

Benchmark	n-shot	Gemma 3 270m instruction tuned
<u>HellaSwag</u>	0-shot	37.7
<u>PIQA</u>	0-shot	66.2
<u>ARC-c</u>	0-shot	28.2
<u>WinoGrande</u>	0-shot	52.3
<u>BIG-Bench Hard</u>	few-shot	26.7
<u>IF Eval</u>	0-shot	51.2

These models were evaluated against a large collection of different datasets and metrics to cover different aspects of text generation:

Reasoning, logic and code capabilities

Benchmark	Metric	Gemma 3 PT 1B	Gemma 3 PT 4B	Gemma 3 PT 12B	Gemma 3 PT 27B
<u>HellaSwag</u>	10-shot	62.3	77.2	84.2	85.6
